no 1140.038

The Flip-Up handle is a special design for use by the handicapped and elderly, making it easy to use the door and lock/unlock, simply by pulling the handle up or pushing it down. This means that the user avoids having to use the twisting action common to many locks, and which is often difficult for these two user groups.

Its simple use makes the Flip-Up handle ideal for all forms of buildings where ease of use by the handicapped and elderly is required, particularly hospitals, care homes, sheltered homes etc.

Available in satin stainless steel (AISI 304).

Supplied with special „turn“ on the inside, lever handle on the outside (style 1011, 1021, 1060, or 1090) and matching escutcheons ø52x4 mm, M4 machine screws and Randi-plug. Fixing centres 30 mm. Standard door thickness 40 mm.

Fits Scandinavian standard locks.
